

WHY THE TRANSCAMPER MINICAMP?

Tired of hit or miss package holidays? Airport queues, crammed coaches and dull destinations? Find yourself wondering about campervans but not quite convinced?

The Transcamper MiniCamp might just be for you. Small, compact and affordable, it has everything you need to put freedom and choice back into your holiday. Hitch it on and off your car in minutes and it leaves a tiny carbon footprint too. Whether for a mountain adventure, forest retreat, beach getaway or city break, it tows easily along.

A comfortable living space by day, with slide open windows and a double-glazed door to let in plenty of natural light, it is built to last. There's also electric lighting, USB charging points, soft seating and a table. It's a perfect reading nook, chillout space or tiny office with a view. It transforms to an 'oh so comfortable' double bedroom after dark and even comes with a memory foam mattress. Think beauty sleep in the heart of nature.

And if that's just a little too cosy, there's an easy pitch awning with a built-in ground sheet for extra space.

Lightweight, easy to manoeuvre, ventilated and insulated, the Transcamper comes with a carpet and heater. The light fibreglass will withstand all weathers and the Minicamp is built to last. It also looks stylish.

Independent travel and flexibility at a price you can afford.
